Airplanes

Wilbur and Orville Wright's first successful flight on the sands at Kitty Hawk, N.C. in December 1903 brought to reality man's eternal dream to conquer the air. Since that historic event right up to the present jet age, building scale replicas of famous airplanes has been a subject of interest to aviation enthusiasts of all ages. Originally built from scratch, airplane models were sometimes crude, sometimes highly detailed works of art. Today, through the miracle of plastics, model airplane kits offer a high degree of detail and realism. Monogram's line of model airplane kits ranges from historic biplanes of the '20s and '30s to the most modern supersonic jets of today and includes many classics from along the way. Each kit is developed through countless hours of background work and technical research and is an authentic reproduction of an actual aircraft.

Cars

Since the early days of motoring, thousands of cars of different makes have come and gone. A coveted few have attained the status of "classics"... museum pieces to be gazed upon by throngs of admirers. Many old time cars outside of the ranks of the classics are sought by collectors to be restored as "special interest" cars, to be customized as "show cars" or souped up as "mean street machines." In recent years, sports cars and recreation vehicles have become an important part of the motoring world.

Classic cars, show rods, special interest, street machines, vans, trucks and sports cars. Car lovers can choose from many of their favorites in model kit form by Monogram.

Armor

Building and painting scale models of historic armor weapons and vehicles is a unique hobby with many military enthusiasts. A skilled hobbyist can paint a 1/35 scale figure in lifelike realism including detailed facial features and uniform insignia. Tanks and other vehicles can be weathered and "battle-torn" to make them look authentic. Many military modelers will spend countless hours in research to get the proper historic background for the models they build, to be sure that all the details are accurate. Historic reference material also provides suggestions for building the assembled model into a diorama, which may often be a reproduction of an actual situation. Monogram kits are favorites of armor enthusiasts because of the highly realistic details in the models.

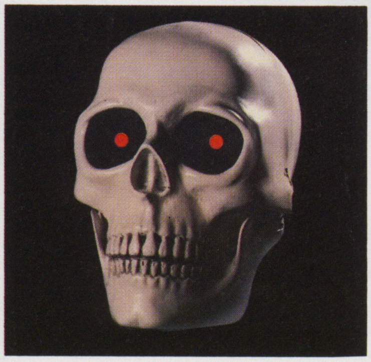
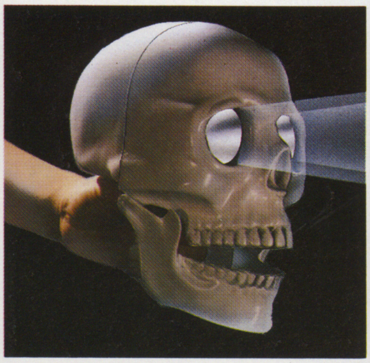
HEAD LITE™

- It's a flashlight!
- It's a fun light!
- It's a SnapTite® model kit!

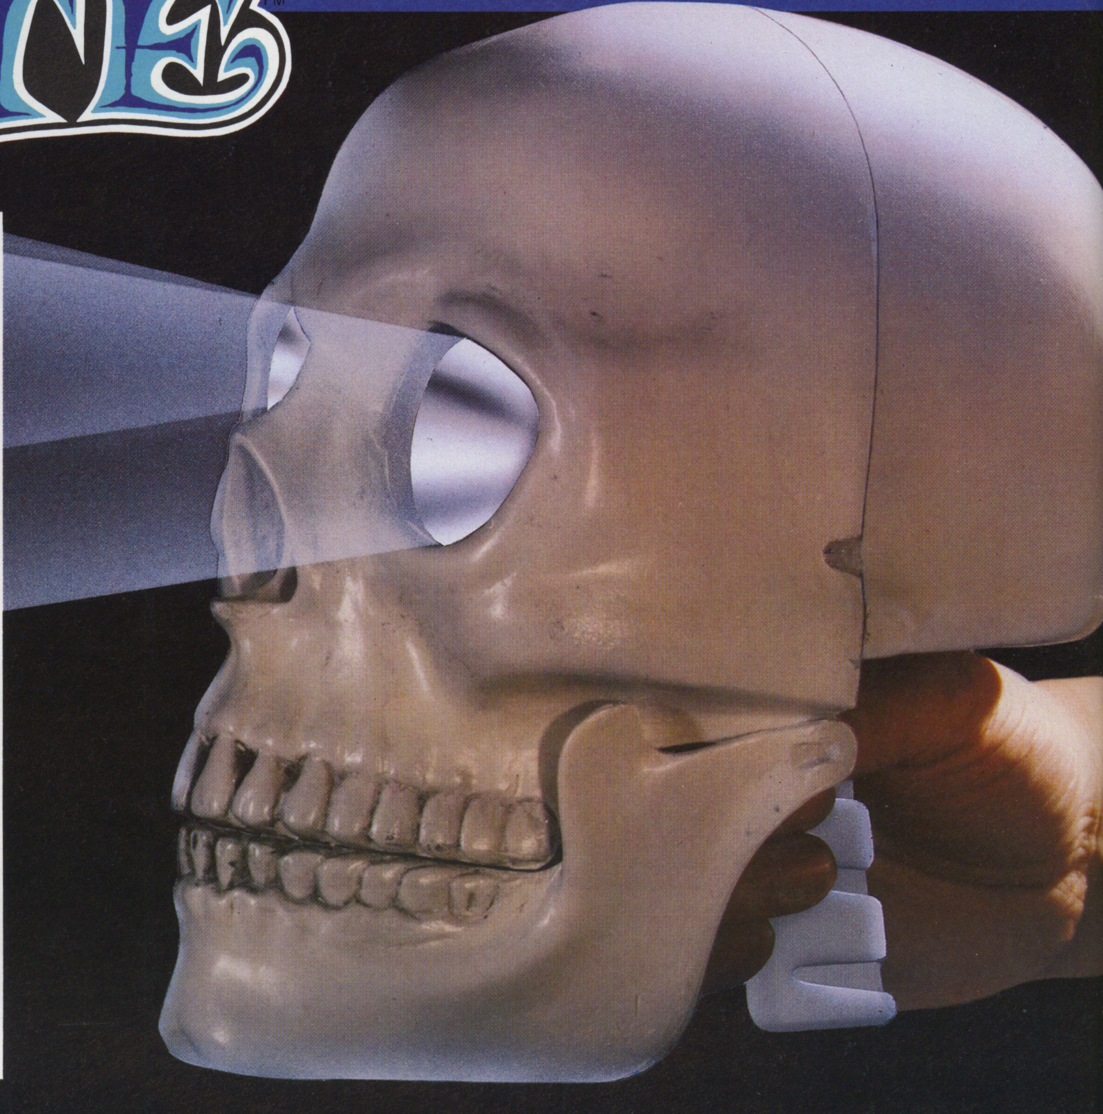
MONOGRAM®



Turn a knob for red-glowing pinpoint eyeballs.



Squeeze the trigger to open the mouth.



6050 Head Lite.™ Kids love spooks, kids love flashlights and kids love model kits. Head Lite is all three... and more. It's a Snap Tite® model kit... it SNAPS together without gluing. It's a life size plastic skull that glows in the dark. It's a twin beam flashlight, OR a single beam flashlight with a flick of a switch. The bulbs are in shiny reflectors in the eye sockets. Clever? There's more.

Flick another switch, give the skull a little wiggle, and the eyes blink on and off alternately and keep blinking until the hidden, motion-activated mechanism swings to a stop. But that's not all!

A turn of a knob reverses the flashlight reflectors and the eyeballs become eerie pinpoints of red glowing light centered in the blackness of the eye sockets. One or both can glow, or they can blink back and forth. Can there possibly be more?

Yes! Squeeze the trigger in front of the hand grip, and the mouth opens. Great for those young ventriloquists. Kids will LOVE Head Lite. In fact, a lot of grown ups are going to have fun with this novel item.

Two D cell batteries required (not included). U. S. Patent Pending.

Molded in "Glow-in-the-Dark" Plastic!

FLAP JACK®

This action-packed model is like nothing you've ever seen before. It'll amuse and amaze everyone who sees it in action. And the kit is easy to put together because there's no gluing. It's a Snap Tite® kit and it SNAPS together. No painting necessary, either.

7503 FLAP JACK®
It's a bird... it's a plane... it's the wackiest propeller driven jet plane you could ever imagine! You've got to see it to believe it. Flick the prop and it spins and spins, driven by the battery powered "Touch 'n Go" motor. Wings flap up and down... machine guns move back and forth. And with all this going on all at once, this unique, action-packed aircraft bobs and bounces all around on its springy wire support. An irresistible novelty for all who see it.
